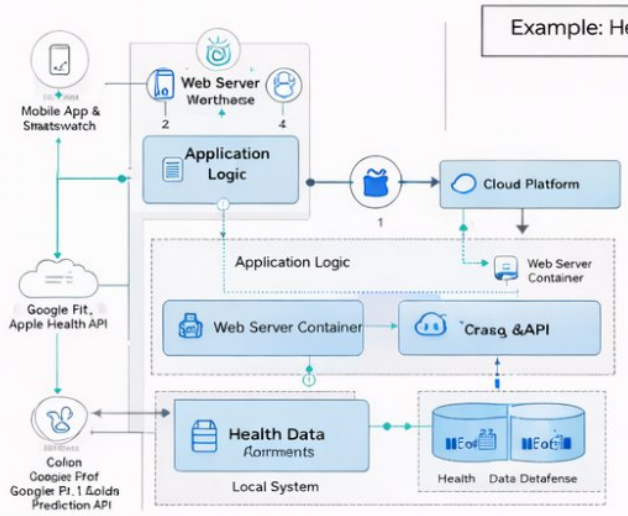
Project Design Phase-II
Technology Stack (Architecture & Stack)

Date	31 January 2025
Team ID	
Project Name	
Maximum Marks	4 Marks

Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per table1 & table 2

Example: Heart Disease Monitoring Application



Example: Heart Disease Monitoring Application

Guidelines:

- Include all the processes (As an application logic / Technology Block)
- Provide infrastructural demarcation (Local / Cloud)
- Indicate external interfaces (third party APIs etc.)
- Indicate Data Storage components / services
- Indicate interface to machine learning models (if applicable)

Table 1: Technology Stack

Table 1: Technical Standarrdl requirements of the proposed Heart Disease Monitoring System.

S.No:	Component	Description	Technology
1.	User Interface	User Interface; asse asses-the-use; in-delemaps-or Flutter	HTML, CSS, JavaSct / Flutter
2.	Application Logic	Provide users to connect metication report elavlbigy/ustrg	Sython; Plane/ rata, Sython / [Jotil Punen
3.	External API-1	Provide external intefaces:: Google Fit API, Apple Healndita	Python Tentnrat Birsteale Ellutter
4.	Database	Provide external intefaces : CDC Blood Pressure / Nutrition API	CDC Blood Pressure / Nutrition API
5.	External API-2	Provide external interfaces: Heart Risk Prediction Model	Health Data Database
6.	Infrastructure	Application Deployment, escat ite A/AWS; Docker, Kubermestes	AWS, Docker, Kubernetes

Table 2: Application Characteristics:

S.No:	Characteristics	Description	Technology
1.	Open-Source Frameworks	List open-source frameworks used	Flutter, Tensorffow.
2.	Security Implementations	List allt all security, / access controls (e.g. of 2r-266, (yatson)	AES-256, Encryptions, IAM
3.	Scalable Architecture	Jusity-rtrngine-uxailbility - (3 – ter, micro-services),	2- ther, mtcro-services, etc.
4.	Availability	Justify the availabillity of extributed servers, etc.	Technology used
